Gasbarre Furnace Group/J.L. Becker Co. Ships New Car Bottom Furnace

Gasbarre Furnace Group /J.L. Becker Company, recently shipped a Car Bottom Furnace to a large Midwestern Aerospace Company. The furnace is designed for a proprietary coating process and is equipped with a 4.5' x 8' x 4' work zone capable of handling an 8,000 lb load with a maximum operating temperature of 1900°F (1038°C). Process capabilities include stress relief, hardening, tempering and preheating. The furnace was custom-designed for specific customer needs.

Located in Plymouth, MI, J. L. Becker, a Gasbarre Furnace Group company, has manufactured a full line of industrial heat treating equipment for over 40 years, providing excellence in design, construction and service. The equipment includes both batch and continuous systems and specializes in Integral Quench (IQ), Tip Up, Box and Car Bottom Furnaces, as well as a full line of replacement parts and auxiliary equipment, including atmosphere generators, quench tanks and charge cars.

###

For more information on how J.L. Becker can provide custom-engineered solutions for your specific thermal heating requirements and manufactured heat treating equipment, contact Eric Buchanan at (734) 855-5460 or email at ebuchanan@jlbecker.com.
